See page 2, an overlay on GSGS 4416, scale 1:100 000, Sheet T-13, Rybnik, on which source identified the following:

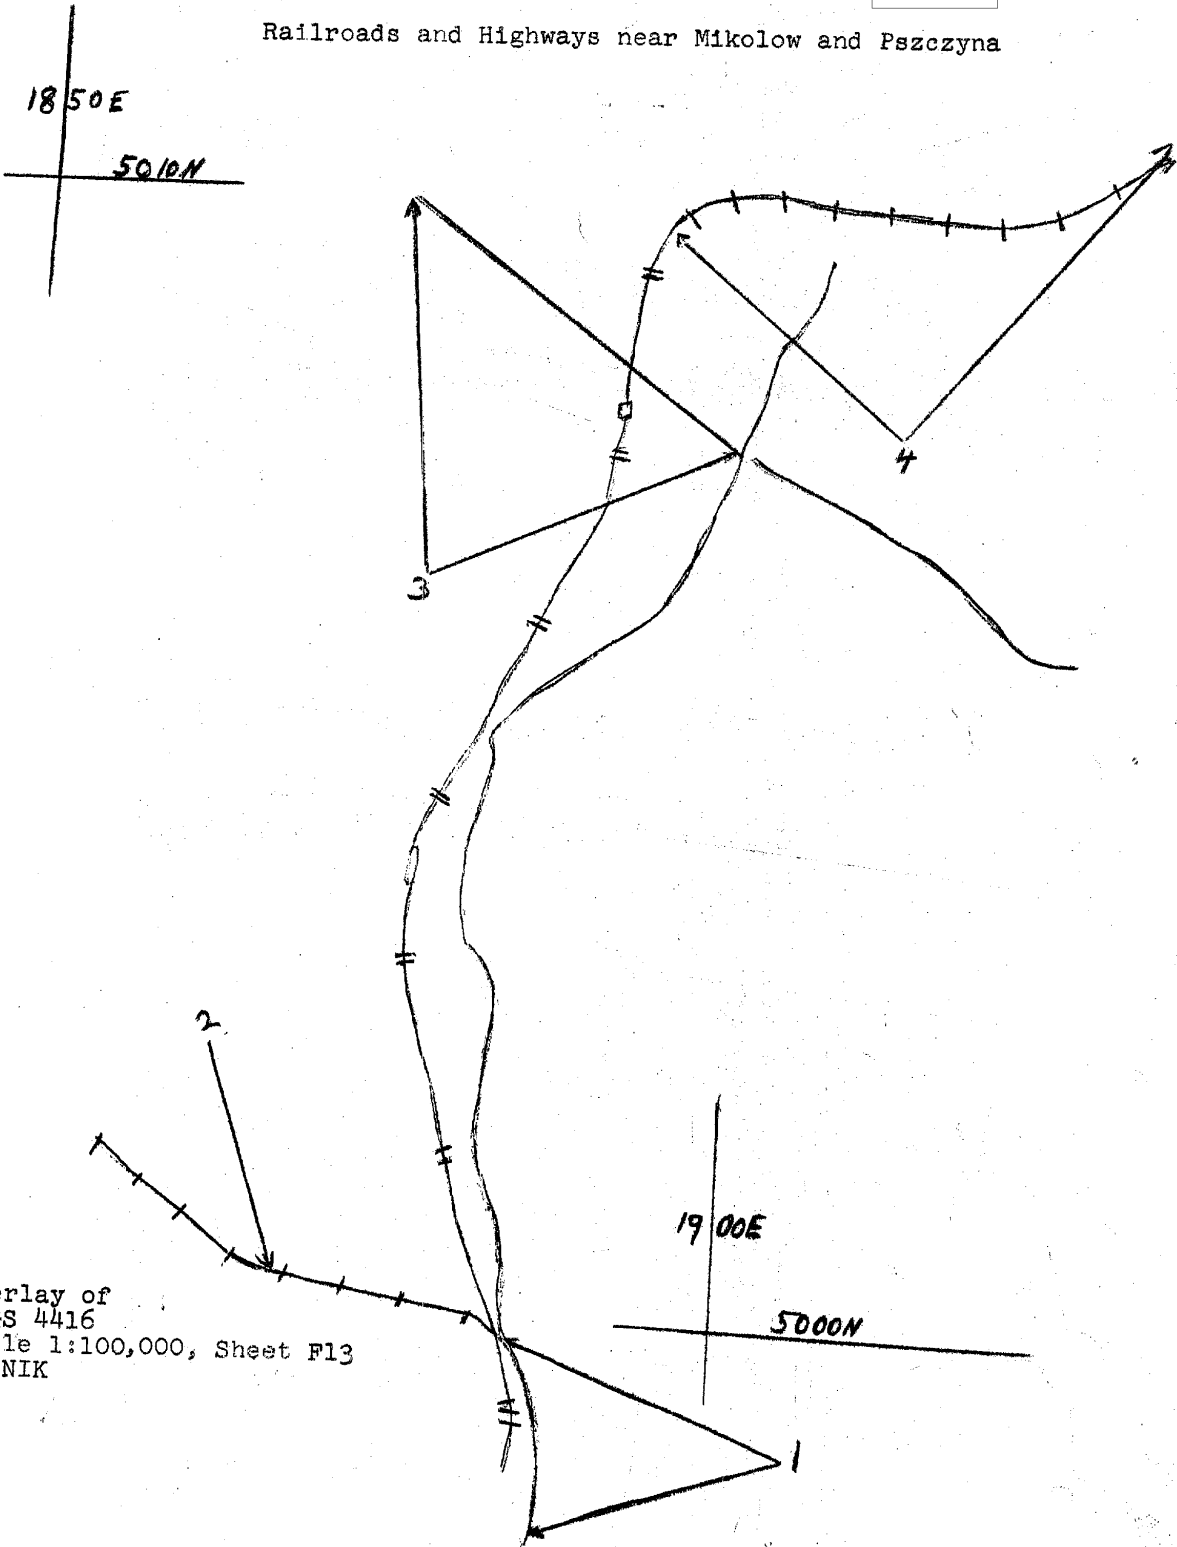

1. Highway - Asphalt, six to seven meters wide, in good condition with small patched up areas. This section of highway, about 3½ km, was not indicated on GSGS 4416; however, source said it was constructed in 1937 or 1938 and was considered a main highway.
2. Railroad - Single line, European standard gauge. This railroad line, about 32 km, was not indicated on GSGS 4416; it was built in 1936 or 1937 and connected Pszczyna (N 49-58, E 18-57) with Rybnik (N 50-07, E 18-32).
3. Highway - Asphalt, with small concrete sections, eight meters wide, in very good condition. This section of highway, about six kilometers, was not indicated on GSGS 4416. This was considered to be a main highway and was believed to have been constructed during the German occupation.
4. Railroad - A new, single, European standard gauge line. The construction of this line was completed in the summer of 1954. Source was only able to indicate a section of this line; however, he was certain that it led to Wesola (approximate coordinates N 50-13, E 19-07). This railroad line was built because of the opening of two new coal mines in Wesola.
